-  [If you want to pretend you're interested in mu life](#) 
-  I never use my phone, sorry

Skills

- **Lightweight:** Because I weigh 60kg, I will wear away furniture more slowly
- **Efficient Gas production:**
My intestines are optimized for CH_4
- **Sobriety:** 1/2 shower per week
- **Technical skills:**
Nothing that chatgpt isn't better than me at, sadly
- **Writing:** My ability to confidently write such convoluted, tortuous yet grammatically correct sentences that theoretically are supposed to be efficiently integrated by any sufficiently involved reader taking time to unravel it may be somewhat useful.

Languages

- **French** - Native: sometimes I write error-free sentences.
- **English** - Advanced (according to a test nobody knows)
- **German** - Mein Gott ...

Interests

I deeply care about myself, but I have no interest in the news. Who's our prime minister again ?

Education

- **2023** **Institut Polytechnique de Paris - Télécom Paris.**
→ First engineering school in computer science ¹
2025 Design and Data visualisation ²
Machine learning and graph learning ³
- **2021** **Classe préparatoire MPI**
→ 2 years of intensive maths, physics and computer science. ⁴
2023 Also philosophy

¹ According to a single, totally subjective, non academic ranking

²: How to chose CSS colors. Very important stuff.

³ Algorithms that look really cool, but that are not used since the 80s

⁴: Nothing particularly useful for a job, but surviving it proves that you have a brain

Projects

- **05/2025** **Teaching experience**
→ Teaching of juggling to my smaller sister.
06/2025 Very efficient courses, since she was able to learn 3 balls move 5x faster than I did, while being a lot younger.
- **09/2024** **Research project: Modeling the graph of French Law**
→ One-year research project on a poorly framed research question.
06/2025 Very good prioritisation of tasks: started thinking about how to best tokenize the law articles before my goal was clear.
Ended up with 100% useless result, despite the field having huge opportunities for innovation.
- **09/2024** **Written work on Minimalism**
→ 3 month writing experience on the design of minimal objects ⁵.
12/2025 I was able to keep my analysis and thought process very minimal to.
- **02/2024** **Cooking**
→ Creation of delicious, affordable, vegan-friendly recipes with very limited kitchenware.
06/2024 Then I abandoned because I love raw carrots a lot.

⁵: To feel better with my lack of any material capital

Professional and associative experience

- **09/2024** **President of P.I.A.F**
→ **Pour une Intelligence Artificielle Fiable.**
present Ghost association that hardly organizes anything except discussions between friends.
But what a great name !
- **10/2024** **Illegal grubbling of trashes at Franprix**
→ In depth exploration of the rubbish bins of Franprix, extraction of (roughly) edible food items.
present Illegal redistribution to my neighbors, without clearly indicating where the food came from.

- **2023** **Improv Theater**
→ Social activity to talk in public, tell stories, and make friends.
2025 Almost restored social skills at a normal level after 2 years of isolation in “Classe préparatoire”.

Plan

Formation

prépa

- survie en milieu hostile en cours de philo
- cours de maths dont les contenus ne serviront jamais à personne

expérience associative

- fouillage dans des poubelles de supermarché
- piaf (trouver quelque chose)
- impro pour comportement social normal

projet

- apprend pas vite
- minimalisme: pour cacher mon capital matériel inexistant et pour me sentir particulier
- projet de recherche: ABCA + sujet bancal + mauvaise priorisation
- cuisine / carotte crues ?
